Dear Shri Manoj Arora,

It was indeed a wonderful experience travelling together to our Plant at Shajahanpur. It gave me a lot of opportunity to discuss with you about various aspects current life management and we dwelt on various subjects of mutual interest.

And coming to the programme, I am glad to inform you that the programme arranged for ladies of township has evoked lot of good feedback. I earnestly hope that the goodwill it has generated amongst the families staying there will pave way for mutual development i.e. Self-realization and growth of individuals as well as will catalyse the positive thinking of individual to the organization/society at large .

Today`s morning was enjoyable for all of us. **We cherish the moment you planted the tree in the factory area.** It was of great significance to me as this little effort by us today will translate itself to an immense benefit for the future generation.

The programme was keenly participated by interaction. I feel that a thought process has been set in motion amongst the participants to think in a wider perspective about way of life. Your demonstration of easy illustrations with a mixture of current and ancient culture provided an opportunity for people to relate the things of past present and future. I am confident that the momentum created in today`s programme of yours will be sustained by all participants. Indeed the day it galvanizes into positive changes, we can definitely see a new HAPPY HUMANBEINGS.

We shall be glad to keep sharing our experiences with each other from time to time.

Thanks and regards

R.Venkataramanan
